

05. ROS 2 Launch, Param, Bag

Lecture

ROS 2 Launch

- Launch multiple nodes
 - Set arguments
 - Monitor running nodes
 - React on changes in the state of nodes
 - Python, XML and YAML file formats
-

Usage

```
ros2 launch package_name file.launch
ros2 launch irob_robot dvrk_server.launch arm_typ:=PSM1
```

ROS 2 Parameters

- Configure nodes at startup or during runtime without changing the code
 - Associated with individual nodes
 - Consists of: key, value, descriptor
 - Available data types: bool, int64, float64, string, byte[], bool[], int64[], float64[] or string[].
 - Useful command: `ros2 param`
-

ROS 2 Bag

- Record and playback ROS topics
